Budget Reporting

Accounts used in school district budgeting and financial reporting are designated by the Department of Public Instruction. A uniform accounting system is essential for the facilitation of reporting, auditing, data processing, inter-district comparisons, and financial accounting for cooperative programs. A complete list of proper account codes and account code explanations are available for review on the website at <http://sfs.dpi.wi.gov/files/sfs/pdf/Revision%20%2322.pdf>.

Fund Accounting

Financial administration requires that each transaction is identified for administrative and accounting purposes. The first identification is by the fund which is an independent fiscal and accounting entity, requiring its own set of books, in accordance with special regulations, restrictions, and limitations that earmark each fund for a specific activity or for attaining specific objectives. Each fund must be so accounted for that the identity of its resources and obligations and its revenues and expenditures is continually maintained.

All funds used by Wisconsin school districts must be classified into one of nine fund types. The primary fund types are the General Fund, Special Projects Fund, Debt Service Fund, Capital Projects Fund, Food Service Fund, Agency (Pupil Activity) Fund, Fiduciary Fund, Community Service Fund, and Package and Cooperative Program Fund.

Basis of Accounting

The basis of accounting refers to the point in time when revenues, expenditures or expenses and the related assets and liabilities are recognized in the accounts and reported in the financial statements. In other words, the basis of accounting determines the timing with which the accounting system recognizes transactions.

Governmental funds, expendable trust funds, and agency funds use the modified accrual basis of accounting. Under the modified accrual basis of accounting, revenues are recognized when they become both measurable and available (susceptible to accrual). Measurable means the amount of the transaction can be determined and available means collectible within the current period or soon enough after that to pay liabilities of the current period. State general and categorical aids, federal impact aid, and other entitlements are recognized as revenue at the time for receipt or earlier if the susceptible to accrual criteria are met. Expenditure-driven programs currently reimbursable are recognized as revenue when the qualifying expenditures have been incurred.

Expenditures are generally recognized under the modified accrual basis of accounting when the related fund liability is incurred. Employee services and payroll-related costs (employee health, life, disability insurance, FICA, Medicare, Wisconsin Retirement System contributions, annuities) other than compensated absences, termination, and other post-employment benefits are recognized in the fiscal period when incurred.

The following tables provide actual audited results for the 2017-18 school year, unaudited results for the 2018-19, and proposed budget for the 2019-20. Actual revenue and expenditures for 2018-19 will be provided after closing entries, and the audit is complete. The budget reported for 2019-20 was reviewed by the Board of Education on June 17, 2019. The detail of the budget can be viewed at the District Administrative office by contacting the Finance Manager.

Debt Service Funds

These funds are used for recording transactions related to repayment of the following debt service. Debt tax levies must be recorded in these funds. The resources in these funds may not be used for any other purpose as long as a related debt remains.

Fund 38 Non-Referendum Debt Service Fund

This fund is used to account for transactions for the repayment of debt issues that were either not authorized by school board resolution before August 12, 1993, or incurred without referendum approval after that date. A fund balance may exist in this fund. Sections 67.05(6a)(b) and 67.12(12(e)(2g)) of the Wisconsin Statutes provides authority for school districts to borrow up to \$1,000,000 without elector approval. The specific limit for each school district is the lesser of \$1,000,000 or a calculated amount which uses statewide value and membership data. The district's limit is cumulative and applies to both bonds and promissory notes. Therefore, at any given time the total debt issued by the district under this provision cannot exceed their calculated authority. If, for example, a district's authority is \$1,000,000, and they have already issued debt of \$900,000 they would only have authority available of \$100,000. However, every principal payment made on the \$900,000 borrowing would increase their available authority limit. Final payment of the non-referendum debt was made in April 2012.

Food Service Fund. Any food service fund deficit, resulting from student food services, must be eliminated by an operating transfer from the General Fund. TAX LEVY EXPLANATION

The school district tax levy is made up of several components. These include:

- Amount of operational dollars needed-General Fund, Capital Projects, Community Service levies
- Amount of debt service tax dollars needed-Debt Service Fund levy
- The equalized value of property in the school district
- Mill (tax) rate

The tax levy is the total amount of property taxes levied or assessed to municipalities in our school district to fund school operations. The maximum tax levy amount, other than referendum-approved long-term debt or long-term debt incurred prior to 1993, is determined through the state's revenue cap (limit) formula. Taxpayer approval, through the referendum process, is required if a school district wants to exceed the revenue limit. The tax levy approved at the Annual Meeting will be adjusted by the Board of Education in October when the Department of Public Instruction (DPI) has certified the district's state equalization aid amount for the 2018-2019 fiscal year which is received in 2019-2020.

Equalized valuation is the fair market value of all properties within a school district as determined by the Wisconsin Department of Revenue. The Wisconsin Department of Revenue uses property sales information to determine a municipality's equalized "fair market" valuation. This information is reported to the school district in October of each year.

The school district distributes the certified (approved) tax levy among the municipalities according to the proportion of equalized value each municipality has in comparison to the total equalized value of the school district. Each municipal treasurer distributes this levy among the various residents based on the assessed value of the property within the municipality.

Equalized valuation plays a very important role in determining the school mill (tax) rate. For purposes of budget projections, the school district must estimate the equalized value (\$607,541,410) which is used for the 2019-20 fiscal mil rate estimate reflecting a 2.9% increase. In October, the actual certified equalized values of all municipalities within the school district are reported by the Department of Revenue. The district then calculates the actual mill (tax) rate per thousand dollars of equalized valuation. Property values decreased in the last preceding fiscal year.

To calculate the school mill (tax) rate, the district uses the tax levy certified (approved) by the School Board in October and divides that amount by the total equalized value of the school district. The mill rate is defined as the rate one thousand dollars of equalized valuation will raise in property taxes. Property owners in a municipality having more than one school district, fire district, or other governmental entity may find that mill rates vary within the municipality. Property owners may realize different changes (typically increases) in their property assessments depending upon conditions within their community and surrounding communities.

The Board is proposing a total tax levy of \$4,662,252.00 to fund the 2019-20 budget. To determine the rate per thousand, the district divides \$4,662,252.00 by the estimated equalized value of the district, \$607,541,410. This produces a projected mill (tax) rate of \$7.67. Since the district does not receive the official (certified) equalized valuation until October 15, 2019, the property taxpayer in the School District of Phillips may realize a change in the estimated 2019-20 mill rate. For example, if the tax levy remains the same as approved, but the total equalized valuation decreases from the estimate used, the mill rate would increase. If the total equalized valuation increases from the estimate used, the mill rate would decrease. The Board is required to make any adjustments, if needed, to the levy on or before November 1, 2019. The final determination of state aid will also modify the estimated mill rate.
