

PARTNERSHIP WITH BUSINESSES

851

The Board of Education recognizes the value of building educational partnerships with businesses. To ensure success requires combining talent and resources from both sectors – business and education. The Board also recognizes that schools need to operate as an integral part of the economic community if students are to receive the type of education and training they will need to function effectively in the twenty-first century.

The District may establish partnerships with other businesses. The purpose will be to seek opportunities for students and staff to share in the knowledge, skills, strategies, and technologies of the business world. Positive school-business relationships should be ethical, structured, and supportive of the curriculum. Properly planned and implemented, such partnerships will have a positive impact on the nature and content of the curriculum as well as on the manner in which students are taught.
